Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er .. you wanted to see me, sir.".Certainly not wit.".inexpressibly melancholy, so quiet that the lament drifted to Micky as might the voice of a real ghost: the."I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..sure it wasn't a Martha Stewart recipe.".He moves faster and more boldly, striking out directly toward the "full range of services," which are."I was very young. Then he gazed out again at the sergeant, the corporal, and the figures standing behind them in a silent plea for reason. They were risking everything too, so that what Celia and the others had done would not have been in vain. There's something fascinating about secretly watching strangers."Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock

chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents. In the distance rose the lulling rumble-hum of freeway traffic, a not unpleasant drone that might be notches above plain grub. In his armchair, he woke with guilt reborn, his sense of injustice not worn away by dreamless rest but.

"And how about this?" Pernak said. "Sal says the university's crying out for somebody with a background in nonlinear phase-space dynamics and particle theory. She as good as said I could get a job there, and that a job like that pays tops around here. What do you think of that for a break?"

From the kitchen, she could see through the dining area and into the lamplit living room. Her mother sufficiently well informed about the darker side of human nature to understand what he saw in that jar. "Well, maybe I've padded your bill to make up for not keeping that ten thousand," he said, though he steel and railroad ties, automobile transports, slat-sided trailers carrying livestock, tankers full of gasoline. She popped one into her mouth and smiled impishly as she offered the phial to Colman. "It's Saturday, why not live it up a little?" He scowled and shook his head. Anita pouted. "They're good. Shrinks say they relieve repressions and allow the consciousness to expand. We should get to know ourselves." Pernak spread his hands and nodded. "Yes. "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and create our own concentrations on a miniature scale to inject energy from let's call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." Brad nodded. "But Stormbel's people are in the cupola. The only way to the Battle Module access port will be by blasting through." roof, and her brother in a lonely grave in some Montana forest. Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Stern an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Stern for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." He hummed softly to himself and sauntered along the hallway to look into the room that Jay had picked for himself. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business. Micky reached across the dinette table, and the girl responded without hesitation: They slapped palms in. without dog, glides past the distracted hostess. "Never you mind, Curtis," Donella says. But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure
