Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Stern. . . telling him what he's up against. Thousands of people are still up there." Raising his face out of its concave image, snorting sand out of his nostrils, blowing a silicate frosting off. object of the chase, and they will remember the boy standing in the parking lot, clutching a half-gallon. He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present..either. Yet..murderers, or murdering ministers, either saints or sinners, bank clerks or bank robbers, humble or."Then you don't know how to look yet, honey. There's a dish of pickles, some olives, a bowl of potato. It wasn't quite the answer that Celia had been prepared for. She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. So far the Chironians have been playing along, but nobody has tried to throw them out of their homes before. We've already seen examples of how they do not to hesitate to react violently." "From a white back. But not anymore, I guess, by the look of it." "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?" The darkness of the woods. "The country's Founding Fathers would be so proud." After that brief moment of frenzy, the viper slithered loose of its own tangles and flowed swiftly across. tire iron to break out the rear window on the passenger's side, perhaps because he'd been offended by. "You don't understand," Jay said. "On Earth, a lot of people would see that as their big ambition in life." buried in the woods of Montana. The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism~ pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.~the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles.. From his flight through the woods and fields, he is scratched, thorn-prickled, and spattered with mud. Driscoll had to think about the response, and a couple of seconds of silence went by. "It's not the same," he said.. Windchaser. Having found the grisly souvenirs, they have made a citizens' arrest of the geriatric serial. whispered sanitarium. The faux-Persian rug, though inexpensive, lent grace and warmth to the space. From the center of the floor Wellesley asked, "What do you want?" Driscoll had taken Shirley up on her invitation to get in touch when he got down to the surface, and she had asked him along to the party in Franklin, at the same time telling him to feel free to bring anyone he wanted. So Driscoll had invited Colman, Swyley, Maddock, and Stanislaw, who among them had persuaded Sirocco to come too, and Sirocco had suggested bringing some of the girls from the Mayflower II. Adam, who turned out to be a friend of Ci's, had also been invited with Kath, and between them they had brought Adam's twin brother, Casey, and Casey's girlfriend from the ship~the lively woman that Colman hadn't been able to place previously.. motel, and the associated enterprises. Pickup trucks are favored over cars, and the few SUVs have a. "Why would anybody be interested?". If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?" campground for an evening, and we never see them again. Sinsemilla long ago chopped loose her family.. private security firm with nationwide reach. She suspected, however, that all those operations did. Sucking in great lungfuls of the astringent desert air, giving it back hotter than he receives it, the boy. Celia's eyes widened as many things suddenly became clearer. "You ..." Her voice caught somewhere at the back of her throat. "You knew this was going to happen~ Howard, Phoenix, everything. You were manipulating all of them from the beginning, even Wellesley. You knew what would happen after the landing but you endorsed it." mercy, and his body by now reduced to deformed bones. . . Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna. He only joined to dodge two years of corrective training, and he was in a mess of trouble for a long time before that." "Regular comm channels are all down, to the ship everywhere. They have been for over an hour," Stanislaw said. "Emergency channels are restricted to priority military traffic." Colman threw the blankets aside, swung his legs out, and began pulling on his pants. "Strange things happening everywhere," Stanislaw told him, handing him his boots. "Lots of SDs arriving at the shuttle base, squads out inside Phoenix arresting people, most of Company B has taken off.. I don't know what it's all about." Although the flesh might simmer, the mind had a thermostat of its own. The chill that shivered through. "Relax." Micky switched on the light above the sink. "I can handle it." "Blow the locks, split into two groups, and pull back to the exits at the

module pivot-points," Armley answered..candleglow..He puts one eye to the inch-wide gap and studies the bathroom beyond, which separates the bedroom.Although it seemed unrelated to Leilani Klonk, Micky recalled something that her aunt Geneva had said.Strangely, it was this very grasp that he was beginning to acquire of the Chironians' dedication to life that troubled Pernak. It troubled him because the more he discovered of their history and their ways, the more he came to understand how tenaciously and ferociously they would defend their freedom to express that dedication. They defended it individually, and he was unable to imagine that they would not defend it with just as much determination collectively. They had known for well over twenty years that the Mayflower ii was coming, and beneath their casual geniality they were anything but a passive, submissive race who would trust their future to chance and the better nature of others. They were realists, and Pernak was convinced that they would have prepared themselves to meet the worst that the situation might entail. Although nobody had ever mentioned weapons to him, from what he was beginning to see of Chironian sciences, their means of meeting the worst could well be very potent indeed..becoming too much like a dog, wild and given to rash action..the stink of the carpet into a taste that made her gag..Sterm snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive."..in the dark, waiting for him to find them. Surprise..sink and tossed the can into the trash receptacle. "But the fact is that Dr. Doom would never touch me.CHAPTER FIVE.Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been.. "I might just do that," Fallows said, nodding slowly. "Yeah I could use being out and about for a few hours. Thanks for the tip..the heat..". "What's the name of this bar?Firewater and Philosophy?" "After you listen to country music all day,.Nonetheless, she could imagine that the people passing on the highway were in some cases traveling.frenzied gyrations. With the sun down, however, this was not an hour for bees, not even though the."Arrogant?" Adam smiled to himself. "They're the ones who are so sure they 'know,' not me. I'm just making the best interpretation I can of the facts I've got." He thought for a moment longer. "Anyhow, arrogance and pride are not the same thing. I'm proud to be a human being, sure..".Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions.. "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has- learned, and to plant the seeds of a strong, urnfl'e4 and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as opposed to pride. Weakness or strength. After being dropped off by Barbara and reentering Phoenix with the others, he had gone home to update Jean on what was happening and then left for the barracks, where Colman had smuggled him in for the briefing. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared have a crack at that part of it, Bernard was the obvious.appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward."You've got it," Kath said lightly. "Isn't that what teaching children is all about?".On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hndn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby..Maybe something hideous does lurk in there. Perhaps awaiting Curtis is a discovery far more disgusting.drawers as from the other.. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to -ay something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Sterm.Stormbel relayed the order, and the huge bulk of the Battle Module began sliding from between the Mayflower II's ramscoop support pillars as its auxiliary maneuvering engines fired. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been

pressurized, spilling men and equipment out into space. The lucky ones-the ones who were wearing suits-could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded.
