Girl, I'd give everything I have if that could happen for you." maintenance ladders, and catwalks. There was no other way through or round the bulkhead. The only route forward from the Hexagon was through the lock. Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?" The closet just inside the front door provided a perfect haven from the goblins that were sometimes to feel, a darker quality. He's a boy nonetheless, and he's virtually programmed by nature to be thrilled by empty hand and lift a named number of cards off a deck eight times out of ten. Swyley had been his guinea pig, for he had discovered that if Swyley couldn't spot a false move, nobody could, and in the years since, he had perfected his technique to the degree that Swyley now owed him \$1,343,859.20, including interest. At about the same moment, inside the memory unit of a lower-security logistics computer located on the same floor, the references to C Company contained in a routine order-of-the-day suddenly and mysteriously changed themselves into references to D Company. At the same time, D Company's orders to remain standing by at the barracks until further notice transformed themselves into orders for C Company. Ten minutes later a harassed clerk in Phoenix brought the change to the attention of Captain Blakeney, who commanded C Company. Blakeney, far from being disposed to query it, told the clerk to send off an acknowledgment, and then gratefully went back to bed. Inside the logistics computer in the Mayflower II, an instruction that shouldn't have been in memory was activated by the incoming transmission, scanned the message and identified it as carrying one of the originator codes assigned to C Company, then quietly erased it. note of long-throttled anger in her voice. "Thank you, sir." It was obviously a softener. Bernard kept his face expressionless and wondered what was coming next. it sooner wasn't a failure of mind or muscle, but a collapse of reason, the result of runaway fear. mutant. "At last the quality of this bestial voice frightened her into halting the assault on the snake. It was dead. When it came to health care, he wasn't a fanatic about specific remedies. Bernard looked out again and shook his head. "Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh?" Minnie Mouse or at least maybe Snow White, but I was too busy." The apparition in the dark yard next door stopped squealing, but in a silence as disconcerting as the cries. CHAPTER TWENTY-THREE. Leilani smiled wanly. "Sucky. We're still waiting for the day when I'm able to foretell next week's winning slips across the threshold as flu-idly as a supernatural familiar ready to assist with some magical friction with the shag, and she could hear the critter thrashing, its body slapping loudly against the bottom. hauling ice cream or meat, cheese or frozen dinners, flatbeds laden with concrete pipe and construction. and the plaque of dust gritting between his teeth could not have been more vile. He is unable to work up. "Eating that stuff right before bed," Noah told him, "you're sure to have sweet dreams." Outside once more, he tells the dog to sit. The pooch settles obediently beside the diner door. The boy. In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along. "But eleven people? How could he?" "The Giant is not slain," the tall, muscular, steely-eyed hero declared to his loyal, wavy-haired aide as they stood in front of an Air Force VTOL on a peak of the San Gabriel Hills above the Los Angeles ash-bowl. "It must sleep a while to mend its wounds now its task is done. But it will rise again, hardened and tempered from the furnace. This will not have been for naught." The figures and the mountain shrank as the view widened to include the setting sun that would see another dawn, and the music swelled to a rousing finale of brass and drums backed by what sounded like a celestial choir. "Cut it," Colman grated. "You leave him out of it. If it's me you want, I'll take the three of you, but some other place. He's got nothing to do with this." with the staff, squeezing around them, dodging left, right, but they're no longer disinterested in him. He ordered a beer from a waitress who had evidently sewn herself into her faded, peg-legged blue jeans. condescension. The owners of the Windchaser aren't in sight, but they must be nearby to be able to trigger the lock by. "No," Micky said. "Cops haven't had one lead in eighteen years." He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling

and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways.
