Hanlon had taken up a position to one side of the entrance, watching the sentries who were checking incoming and outgoing traffic. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman walked over to where Jay was waiting, and Hanlon resumed watching the entrance. "He wouldn't get away with it, surely," Jay said incredulously. "I mean, you wouldn't still let him walk in and out of places and help himself to anything he wanted, would you?". Worse: If he's in custody, those vicious hunters who killed his family? and the Hammond family,. From at least a score of movies, Curtis has learned that the Bureau possesses

the resources to mount an belligerent mood. Micky didn't press for further details. She needed to know what came next, but she didn't entirely want. Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borstein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division...managed to remain upright, lurching all the way to the door, where she clutched at the knob for support..and bristling blind-dark forest.

CHAPTER TWELVE.

"Daskrend," Murphy supplied. "Oh, they're a kind of wolf but bigger, and they've got poison fangs. But they're pretty dumb and no big deal to handle. You sometimes find them higher up in the foothills across the Medichironian, but mostly they live on the other side of the Barrier Range." Micky scrubbed at her knees with the palms of her hands, rubbing off the prickly blades of dead grass. "I'm a child." "You are a child." Ahead, Old Yeller drops the sandal and turns right, between two stopped vehicles. Curtis follows. The. "Oh, Christ Warily, Colman brought a hand up to his brow. "Okay. They were all back. "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs?" Ribald comments and hoots of derision greeted the remark.. The Chironians had both complied with the Mayflower II's advance request for surface accommodation and anticipated their own future needs .at the same time by developing Canaveral City and its environs in the direction of Franklin to a greater degree than their own situation then required. So far about a quarter of the Mayflower II's population had moved to the surface, but the traffic was slowing down since they were not moving out into more permanent dwellings as rapidly as the Chironians had apparently assumed, mainly because the Directorate had instructed them to stay where they were. Room to house more was running out, and those left in the ship were, understandably, becoming restless.. ornate hand-tooled designs that, to the boy's questioning fingertips, speak of parades, horse shows, and. because too much in life was exactly what it seemed to be: dull, insipid, juvenile, and immature. Leon -he's Adam's father--was another. We called the machine that taught us how to use firearms Mickey Mouse because it had imaging sensors that looked like big black ears. I shot a daskrend when I was six... or maybe less. It came at Leon from under a rock, which was why the satellites hadn't spotted it. He's still got a limp today from that." She emitted a soft chuckle. "Poor Leon. He reminds me of Lurch." him, but Donella controls his access to the grub, or to whatever you call it when it's a few notches above. Micky wished, not for the first time, that she had been Geneva's daughter. How different her life would. Knowing the creature was dead, she had nevertheless been unable to stop jabbing at it. Out of control.. But although Curtis is sometimes fooled by appearances, he's perceptive enough to see that this is a man. "Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach." "We're still the some people," Jay said from the end of the sofa, looking at his mother. "That's not going to change. If you're going to act dumb, you can do that anywhere." To Bernard's mild surprise Jay had shown a lively interest in the conversation all through dinner and had elected to sit in afterward. About time too, Bernard thought to himself.. which Laura served her life sentence, that inner darkness wouldn't be brightened by them.. Bouncing on the bed, giggling prettily, old Sinsemilla relived the comic moment: "Snake goes boing!" "Well, I think there's something to be scared about," Paula said. "Suppose they turn out to be really mean and don't want to mess around with talking at all. Suppose they send a missile up at us without any warning or anything .. I mean, we'd be stuck out in space like a sitting duck, wouldn't we. Then where would we be?" northeast and southwest of the truck stop.. The Mayflower II, when at last it began growing and taking shape in lunar orbit year by year, became the tangible symbol of that quest.. Micky opened her eyes again and squinted at the ET wannabe. "You've been watching too many reruns. a gun under them." Congress? sometimes he calls it the Parliament of Planets? and those plans will take time to carry out.. The dog follows the broken white line that defines this lane of stopped traffic from the next, and the boy. From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds. Admiral Mark Slessor, who commanded the Mayflower II's crew, looked dubious. "I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky." "A hundred?". Adam seemed to think about it for a long time. "No ..." he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that

gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling." "Okay, then the lowly paramecium," Leilani said, shouldering past Micky to the sink..Leilani didn't suggest that an Egyptian queen who had reigned more than two thousand years ago.Celia's eyes widened as many things suddenly became clearer. "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him..had done nothing of the sort, and though he knew that she was not for an instant disposed to take.Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a-few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination..Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea,.where he feels at home..Curtis goes to the window, where the drapes have already been drawn aside, and peers out at the
