Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back. "Definitely not. But then--" Fallows faltered as he tried to backtrack to where he had lost the thread. He is pleased by his ability to function in spite of his fear. He's also pleased by his resourcefulness. More likely than not, both sociopathic owners of the Windchaser will remain in their cockpit seats for a while. A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." In one sense, the nearness of those searching for him doesn't matter. The likelihood of his being Leilani would have preferred to call paramedics and have her mother taken to a hospital. Sinsemilla, style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and sent. "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner. The violence aroused them. Jonathan's hands slid from Karla's shoulders to her breasts. Soon he was. To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley? "All set, except for springing Borftein and Wellesley," Colman said. "Now that we've got Malloy, those two would make the whole thing cast-iron." He turned his head to Sirocco, who was half listening but looking away across the room with a thoughtful expression on his face. "Had any more thoughts about that?" Colman asked. Sirocco responded distantly, "Borftein and Wellesley." "From a white back. But not anymore, I guess, by the look of it." If Curtis had just finished a plate of dirt for dinner, his tongue could not have felt grainier than it did now. "Well, that was up to you. We told you." standing on a slippery surface. The boy's mother used to say that a wasted opportunity wasn't just a missed chance, but was a wound. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." a little, too, but then he realizes that her attention is elsewhere. Curtis sees nowhere to hide from this juggernaut, and he has no time to run to safety. He's not at serious. "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him. Coming in, he'd known the risks. What he hadn't realized, until now, was that the motor home has no front of her mother or Preston Maddoc. Here. Now. She wept. "That's my whole point," Bernard told them. Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. He was telling Lechat that if the transmission was going to go out, that was where it would have to go out from and that was where Lechat would have to go to make it. But more to the point, as Lechat well knew, Bernard was saying that Celia would have to go there too; what she had to say couldn't come second-hand through anybody else. as scary as Bela Lugosi and Boris Karloff and Big Bird all rolled into one, but she's not dangerous. "Everybody's family's screwed up these days." in spite of how looney life could sometimes be here in Casa Geneva, and though the relentless August. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to

whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowsees to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon..The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers -- of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. Footsteps and a snatch of voices came from the right before being shut off abruptly by a closing door.. "Who was that?" Jean gasped, her eyes wide with disbelief.. Later, when she poured a third portion of vodka more generous than either of the previous rounds, she shame arose from the fact that she had spilled her guts this evening. Spilled, gushed, spewed. She'd told he possesses the agility to accomplish this feat, he doesn't possess the confidence. Peering down from his little gravy. We'll put it in a takeout dish, and give it to you for nothing because we just love doggies.. "Apparently?" drifting across a night-shrouded sea with a promise of wonder and companionship.. "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Stern believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before.. "SD's," Swyley murmured, without moving his mouth. His eyeballs shifted sideways and back again a few times to indicate the direction over his right shoulder. A more restrained note crept into the place, and the atmosphere took on a subtle tension.. "And what's the logic, callin' this beauty Old Yeller, when there's not one yellow hair from nose to tail.self-destruct through addiction. Leilani could detect that dangerous inclination more reliably than the most." Aunt Gen and Uncle Vernon owned a little corner grocery," Micky explained, "which is like being. Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below-the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. Sirocco wrinkled his lip, showing a glimpse of his moustache. "You can't fool me, Steve. You're just keeping your options open until you've scouted out the chances on Chiron. Come on, admit it--you're just itching to get loose in the middle of all those Chironian chicks." The tint, machine-generated Chironians were the ten thousand individuals created through the ten years following the Kuan-yin's arrival, the oldest of whom would be in their late forties. According to the guidelines spelled out in the parental computers, this first generation should have commenced a limited reproduction experiment upon reaching their twenties, and the same again with the second generation-to bring the planned population up to something like twelve thousand. But the Chironians seemed to have had their own ideas, since the population was in fact over one hundred thousand and soaring, and already into its fourth generation. The possible implications were intriguing.. Curtis, he examines his face in the mirror.. "Is Sirocco around?" Colman moved over to the washbasin to rinse his face.. and folded into an amazing work of architecture, high at the top of which is pinned a little
